Locality #1

Antigua Vieja

El Potrero Fincia Old Antigua

About 3 miles West of Antigua

Valley between low ranges of hills and Volcano de Agua opposite our collecting ground. Valley and hills all under cultivation with Coffee & Sugar. Slopes of Volcano de Agua well up all under cultivation. Peaks appears densely wooded. Cane fields cut up by irrigation ditches and coffee trees cover floor of valley.

Locality #2

Slopes of Volcano de Agua on North side. at 5600 ft starts corn fields reaching to 6,500 ft Upper part with peach and avocado trees. Slope of mountain well cleared and small piles of corn scattered about fields

at 6,500 ft the thick rain forest begins with a well defined line. Trees and vines thick and ground covered with matting of dead leaves. Very few fallen trees. Some quite large trees overgrown with vines and streamers of a species of Cactus hanging from limbs. Moss and orchids abundant.

May 15 Collected on slopes of Volcan de Agua finding lizards rather scarce and mild. Collected two species of Sceloporus, one Anolis, one snake and one Salamander # 76 under bark of a fallen tree. Very few stones and fallen logs to hunt under and no water in arroyos. Ground under leaves quite damp. Lizards (Sceloporus & Anolis) were found

on small rock piles in the corn fields

May 16 I visited same locality and collected  
 same species of *Sceloporus* & 3 anolis  
 in similar localities. One anolis  
 in brush close to Puellos of Old  
 Antigua.

# 88 *Sceloporus* (aeneus?) Color in life - Back  
 between limbs light green, upper surfaces  
 of limbs same. Tail bottle green above  
 to lighter green on sides and under surface.  
 Top of head brownish, black shoulder  
 patches, black collar extending across  
 throat. Throat light blue. Under  
 surface between limbs light blue on  
 sides inner edge of blue bordered  
 with black and black lines separated  
 by line of greenish yellow. Under  
 surfaces of limbs greenish yellow.

4

Anolis #87 upper surfaces brownish  
with median line of black between  
limbs. Lateral white line extending from  
front to hind limb becoming very faint  
posteriorly. Entire under surfaces grayish.  
Gular pouch deep orange with <sup>horizontal</sup> six lines  
of yellowish scales

Locality no 3

May 22 made a trip to a small lake near  
the Puellos of San Antonio. Lake  
about half a mile long surrounded  
by much marshy land Cat tails  
and few small trees. Situated  
in a valley which is a branch of  
the main valley in which Antigua  
is located.

(5)

May 23 collected along irrigating ditches  
at San Antonio for *Basiliscus*  
Found four specimens and lost  
one. These lizards inhabited the  
dense thickets along the ditches  
of running water and were found  
on top of vines covering the under-  
growth. On being alarmed they  
leaped to the ground and ran up  
the big trees close by. All specimens  
seen were very active and shy. The  
one lost was first seen on top of a  
stump and on being approached leaped  
at least 12 feet into the brush  
and could not be found.

May 24

Collected at small lake near  
San Antonio.

Color in life Specimen # 319 - American

Wide brownish band extending from  
back of head to base of tail with  
black bars broken on median line  
between limbs. Top of tail lighter  
brown with black dots at base

Top of head brown. Top of limbs  
brown mottled with black. Sides  
of head and gular region lemon  
yellow. Sides between limbs  
black mottled with sky blue. Belly  
under surface of hind limbs and  
tail sky blue. Under surface of  
fore limbs yellowish.

In some specimens gular region  
varies from lemon yellow to orange  
to brick red.

May 24 Colours in life H. 2nd 200 ft.  
Back and head of body greenish  
green. Top of head dark bottle green.  
Top of tail light bottle green.  
Yellow patch bright blue band  
on back, an orange band H. 16  
Scales wide: Body bright  
with median line of black color  
about base of fin - white. Under  
surface of head fins greenish  
orange. Under surface of head  
and lower part black dorsal. V. all  
surfaces of head light bottle green  
dark brownish patch.

May 26 # 361-354. Collected in vicinity  
west of Sauratown on a tree with  
fence. Enclosing a corn field.  
They were found on the side of  
fence posts among the thick leaves  
of the hedge. The water in the  
immediate vicinity. Water was found  
the liquid cotate and say it is  
always found along stream in  
water.

May 31 # H30. One's collected at edge of  
forest above Sauratown 6,800 ft.  
found in a small stream of water  
in a corn field.

March 8

Spec. 12 Collected on grass from  
Bullington. Locality is in center of  
banyan field and has a large  
broadest shaped lagoon about  
150 yards wide. From a small  
opening at the edge of lagoon  
land is visible to the left.  
Edge of lagoon land is  
of grass bamboo and has a  
small trail, but through it  
is the road to the water.

#332 Caught at angle of small field,  
net while resting in an upright  
green stalk over small ditch full  
with water.

(13)

# 578 River Bank -  
North on field, from following back-  
to-a-line crossing in field in type  
grass green. Faintly visible  
with white spots and  
lenses. B. L. L.

p. 171 Caught in small puddle  
at night. Another specimen in  
small puddle swept. One specimen  
when heard calling in groups.  
The first. Found and (p. 172)  
the second. Both seen and called  
but were far and called. Calling was  
loud. The light of day was bright  
and in it.

648-649: single at night with limited  
nest activity. started with flat on top.  
Some large lumps and small stones.

4:30 P.M. Anacapa light ahead  
clear weather sea smooth anchored  
off San Pedro light at 10 P.M.

April 17 Docked at Washington at 8 am  
Spent day in Los Angeles and sailed  
at 6 P.M. for Manzanillo Mexico

April 18 On deck at 7.30 a.m. weather clear and  
sea smooth. Land visible through  
haze and vessel well off shore

April 19 Passed Cabo San Lucas during night  
about off Abasco Point at 9 P.M.  
Passed several vessels heading north  
weather clear, smooth sea vessel  
well off shore

April 20 Easter Sunday. Foggy weather during A.M.  
and vessel sounding fog signals. Fog  
lifted at noon and vessel  
well off shore. At 4 P.M. passed  
Cabo San Lucas about 10 miles  
Hove to off Cabo San Lucas & received

Three steamways off San Francisco  
About 5 P.M. Under way for Alameda  
fine clear weather smooth sea. Had a  
fine view of the Golden Gate at  
end of Cabo San Lucas.

April 21 Weather overcast  
at noon. Smooth sea. Sea  
down so as not to make Alameda  
too high. Expected to reach point about  
7.30 A.M. Nothing of note.

April 22 Arrived at Alameda about 2.30  
no rain. Sea smooth. Weather  
looked very dry. Dropped anchor inside  
breakwater along side the Alameda  
gunboat "Magenta". The gunboat  
"Magenta" (formerly one of our sub-  
marine force) under command of Capt.  
Victor Angeles with whom I met.

Came to go to the school and  
Wagahama Bay in 1916. Paid the  
Captain a visit and told him  
the ship will leave at 10.30 Saturday  
about 11 o'clock for Champagne.  
Weather pretty cloudy but  
small

April 23 Weather pretty clear and breezy  
9 AM passed big freighter with  
deck load of lumber heading  
the Southward

April 24 At Sea from Champagne  
Champagne Bay hazy to all  
and from beyond ship making  
12 knots

April 25 Arrived about 6 30 a.m. at Champerico  
anchored about 2 miles off shore  
opposite village and ship lying all  
day loading & unloading. Cargo sailed for  
San Jose about midnight.

April 26 Arrived San Jose de Guatemala at 8  
Doctor boarded ship about 9 a.m.  
after breakfast and examination of feet &  
went ashore in lighter. The collection  
of Customs passed by baggage  
examination owing to the illness  
from the Consul General's Secretary in  
20th January. I found that the  
the town of San Jose had been destroyed  
by fire and all Customs affairs  
were attended to at Guatemala City.  
Mr. Sargent the American Consul  
supplied me with stamps and I  
proceeded at once on the morning  
train to Guatemala City. I stayed

Had a light supper and then  
went down in for some

April 29 Was awakened at 7 am. by all  
the church bells in the city. They  
were ringing for about ten minutes  
enough to wake the dead. Then  
breakfast wait in the P. M.  
see Anthony and then to the  
the success collected still shows the  
damage from the great earthquake  
of 1915. The dome and the  
bunched down on walls as  
of statues or columns in front  
of the entrance. The building  
into and the walls and

inside available, the  
quite plain and no attempt  
decoration. This afternoon I  
walk around town and saw  
many signs of the wrecked  
underground. There are  
There are quite a number of old  
a small museum left from the  
west of the millage and the  
barrocks of soldiers scattered about  
the city. The streets are narrow  
paved with blocks of flag of stone  
shaped and some very small  
city seems to have its full complement  
of soldiers and they are  
right out in the middle of the  
street canvas. I have one or two  
if any number at night and  
heard his whistle from across  
in a while for why I know not

The City of Guatemala is like most  
American & Central American  
only on an enlarged scale.

April 28 Called on U.S. Consul our Holland sub  
was very obliging and gave us a  
letter to the Secretary of the Ministry.  
The most influential man in Guatemala  
also attended to getting gun permits  
which every man in Guatemala must  
have. In the afternoon visited the  
Secretary of Foreign Affairs who is to  
give us letters to the various officials  
in the different States we wish to  
work in, as the various public  
buildings are scattered all over the  
town it took an entire day on official  
calls.

April 29 Called on our host and  
him to the Bank and Custom  
house and was introduced to  
the Chief of the Customs credited  
with being the only honest man  
in the whole country. Presented  
letters of introduction to our host  
who very kindly gave us  
permission to travel on the  
road between the two  
stations. He also gave us  
in their warehouse to store our  
goods. Called again on the Chief of  
affairs and gave him a list of  
places we were likely to visit  
he requested. Paid a visit to the  
remains of the ancient city  
and found some of the best painted  
reptiles and insects found in  
Guatemala. All in Corral de El  
Paso.

as is usual in museums in  
this part of the world.

April 30 Called on U.S. Consul and got time  
for our appointment to see the  
Secretary of the Hacienda, with  
Customs Bureau to see about  
arrival of freight and found it  
not arrived as yet.

May 1 Called on various officials securing  
necessary permits and arranging  
discharge of freight at Customs.

May 2 Went to Playa and saw houses  
at edge of city and saw many  
the earthquake of 1917. The land is  
furtherance houses in San Felipe de

May 3 Spent day trying to get a suit  
box my freight and see what  
chances were of getting it under

May 4 Sunday. Nothing doing. Store  
closed and all work

May 5 Visited U.S. Consul and looked  
matter of a truck to know  
the go. Petronio Officer of  
Antigua, was introduced to a German  
who had auto trucks and he offered  
\$60.00 freight to let the freight  
good road at distance of  
so out here quick and arranged  
through Schenck and Co. to  
outfit out by a bus train. Saw wife  
here one morning and arriving in  
Antigua about noon next day.

May 6 Visited Customs house and got  
line on the case my freight  
Found it up against platform & i  
expect to get it unloaded

May 7 Spent day at Custom house and  
finally got my freight out. Some  
Boxes badly damaged from rough  
handling but nothing lost. I  
stored at Matthews Bros and  
to expect Antigua to arrive

May 8 Inspected boxes and making arrangements  
to get an ex from the boat agent  
to Antigua.

May 9 ~~Boat left but unable to get~~  
~~ex from boat to Antigua~~ and on  
arrival of the U.S. Dept of Agriculture  
will be doing some work in September

May 9 Ox team left this A.M. and expected it to arrive about noon of the 10th. Distance about 50 miles.

May 10 Left Guatemala City at 9:30 A.M. by automobile for El Peten Union. When we arrived about noon. Found out that for Guatemala City. Country around around the city. Then out would report. Passed on Indian women with baskets load with produce for the market and all carrying them on their heads. Arrived at Union about 5:00 P.M. and were met by the Clerk in charge of the office who ~~was~~ received us very graciously. Had lunch and then met the Ox team which had just arrived. Proceeded at once to make camp in yard near

May 10 The Volcans de Agona  
in sight from our hotel above  
Shops are cultivated a large area  
up and the top appears to be  
with a forest and small woods  
Surrounding country all under cultivation  
with coffee and sugar cane. A fine  
cruade arrangements to get out the  
Volcans which makes it rather  
convenient. We sat with the  
Clark and an Indian girl  
went on horse.

May 11 Took a walk up valley towards the  
next Pueblo San Antonio. Found  
country all under cultivation  
up onto the slopes to stone house  
cut up by irrigation ditches. Rather  
poor prospects for hunting.

May 12 Worked around some fields and  
Coffee trees. Dipped some and found  
only three species; one in the field  
Baker. Found in irrigation  
and some in the field  
and Coffee. Yellow Bay and

May 13-16 Working around the same fields and  
May 14-16 Working around the same fields and  
at 700 ft. the vegetation is  
many large trees and some  
and some. The field is  
found many birds but the  
account of some and growth  
length of time, all Anthony Clark  
has seen the field seen above

May 17 Took a walk around the

The Cathedral, a large one. It is built of  
masonry it is the first Cathedral built in  
in 1534. Building built of masonry  
Two small towers on the sides of the  
arched door with of the middle  
a central tower, generally the largest one.  
There is a small tower on the sides  
not as tall as the central one  
all of masonry. The Cathedral is typical of  
all Catholic American Churches built  
of masonry and masonry.

May 17-22. Working about El Palacio Nacional  
and the Cathedral.

May 22. Reached a large town.  
Pueblo of San Antonio. Visited the  
Church which is typical of the  
Country and is well preserved a  
good example of the old style.

July 1 - 17

Spent at the British Museum

Enjoying the last of the day  
since visiting the British Museum

is a small town with the river  
and the bridge. The town is a

all the time of the day.

Trip to Long Beach

July 1

Left Seattle for Long Beach

at 7:30 a.m. in the car

with Ben and Jack at

our hotel in Long Beach

to the Hotel de Ville in Paris

July 2

Left

from present playground and  
municipal school building to  
Solutions and all government  
buildings around playground.

The morning of the 1st of  
April of 1901 we left our  
baggage started for the house  
so it would have a chance of  
arriving there before the afternoon  
train. Called on the fire department  
and presented a note from the  
fire department. The fire department  
did not seem to mind any but  
had some of the fire department  
and the fire department  
The fire department are all out of  
a two hour trip. A rough  
road that the fire department  
about able to find a road  
through cultivated land and some

of Zuni Volcano from the

most beautiful view from the  
drive up the steep hill  
clear to the north from the

in the distance. They were  
a great sort of light snow  
the color of the snow  
snow covered ground  
with green and brown  
green

down from the top to the  
given the color of the snow  
become more so that an old  
would reach the top of the

The Western of Santa Rosa  
visible from position  
Crested with the  
East side of the  
Santa Rosa to the  
Crest - a small  
a few feet higher  
September 1900  
a few feet higher  
the crest.

June 1900  
July 1900  
August 1900  
The Santa  
Crest of the Santa Rosa  
and a small distance  
of the Santa Rosa  
above the crest of the Santa Rosa

On going around yesterday found  
many large trees uprooted and large  
limbs broken off. The plows men  
at once set to work clearing up  
trails and roads that the trees  
had fallen across. Many were  
one of daily occurrence and  
after a accompanied by heavy  
thunder and lightning.

Aug 31 Packed up collections and were  
ready to depart from Guatemala City  
a 2 days trip. In A.M. went  
on a hunt with the foreman and  
saw an Agouti which got into  
a den so set a trap. Weather  
overcast and threatening.

Sept 1 Left Frica de Apres for Mayatungo where we arrived at 11:30 in order to get baggage checked for the train of Sept 2 had to pay a dollar to baggage man to check it so we would not have to hire a cart to take it away and store it over night. Spent afternoon in Mayatungo keeping out of the rain.

Sept 2 Left Mayatungo at 8:15 <sup>am</sup> and arrived in Guatemala City at 7:15 and put up at Ixamal Hotel.

Sept 3 got baggage out of depot and prepared to pack specimens for shipment to San Francisco.

Sept 4 Mr. Anthony left this AM

for another stop a Program  
while I got Shipment ready  
to send to S.F. Was informed  
by U.S. Consul yellow fever  
had broken out in Salvador  
and fear was expressed that  
Port of San Jose would be closed  
so forwarded letters to our San Jose  
Consul at San Jose to arrange  
for Shipment on Steamer to S.F.  
Spent time in getting the  
waiting train to meet Steamer  
at San Jose so as not to stop  
night.

Sept 11 made trip to San Jose. Left  
Guatemala City at 7:15 Arriving  
in San Jose at 5:30 met Mr.  
Swasey and attended to procuring  
Sailing permit so went  
aboard Ecuador just in time to

Supply not among passengers  
and have a state room to  
myself

Sept 16 at sea, smooth sea and  
plenty of rain squalls, weather  
cloudy. Vessel well off shore
